SUMMARY

Full Stack Developer with expertise in TypeScript, Next.js, and Node.js, passionate about building scalable, high-performance web applications. Seeking a remote role in a US-based company, where I can contribute to complex projects, optimize system performance, and grow within a collaborative and innovative team.

EXPERIENCE

Full Stack Developer Intern

Spray Solutions

January 6, 2025 – March 14, 2025, Hybrid (Brazil)

- Developed and optimized mobile applications using Flutter and Firebase, improving authentication flows and real-time data handling.
- Automated workflows by implementing Python scripts for Google Cloud, reducing manual workload.
- Debugged and optimized production applications, enhancing performance and stability.
- Collaborated with cross-functional teams (designers, engineers, project managers) in a hybrid work model, balancing remote and on-site work..

PROJECT

Testing & Deployment

- Performed manual and automated testing using Postman and unit testing frameworks.
- Set up Docker containers for local testing and isolated development environments..

Full Stack Web Applications

- Designed and built scalable web applications using Next.js, TypeScript, and Node.js.
- Developed REST APIs with Fastify and Express.js, integrating PostgreSQL and MySQL databases.
- Implemented secure authentication using JWT-based authorization.
- Optimized database queries, reducing response times by 30%.
- Created responsive UI components with React.js, HTML, CSS, and Tailwind CSS.
- Deployed applications on Vercel and Firebase Hosting..

EDUCATION

Technical High School in Computer Science

Colégio Técnico Industrial de Santa Maria (CTISM - UFSM) • Brazil • Expected Graduation: December 2025

- Coursework in Algorithms, Data Structures, Object-Oriented Programming, and Web Development.
- Developed multiple academic projects applying TypeScript, PHP, C, and C#..

COURSEWORK

Algorithms, Data Structures, Object-Oriented Programming, and Web Development

SKILLS

Frontend Development: HTML, CSS, Next.js, React.js, Redux, Tailwind CSS

Backend Development: Node.js, Fastify, Express.js

Databases: PostgreSQL, MySQL

Tools & Deployment: Git, GitHub, Vercel, Firebase, Docker (basic)

Programming Languages: TypeScript, JavaScript, PHP, Python, C, C#
